Information:Gradle tasks [:app:assembleDebug]

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.XmlBeans$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.XmlSimpleList$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.XmlSimpleList$2) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.inst2xsd.RussianDollStrategy$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.inst2xsd.util.Type$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.jam.JamUtils$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.regex.SchemaRegularExpression$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.regex.SchemaRegularExpression$2) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.regex.SchemaRegularExpression$3) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.schema.SchemaTypeLoaderImpl$SchemaTypeLoaderCache$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.store.CharUtil$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.store.Locale$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.tool.CodeGenUtil$ThreadedReader$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.tool.CodeGenUtil$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.tool.SchemaCodeGenerator$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.tool.SchemaResourceManager$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.tool.XsbDumper$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.validator.ValidatingXMLInputStream$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.

Error:warning: Ignoring InnerClasses attribute for an anonymous inner class

Error:(org.apache.xmlbeans.impl.xpathgen.XPathGenerator$1) that doesn't come with an

Error:associated EnclosingMethod attribute. This class was probably produced by a

Error:compiler that did not target the modern .class file format. The recommended

Error:solution is to recompile the class from source, using an up-to-date compiler

Error:and without specifying any "-target" type options. The consequence of ignoring

Error:this warning is that reflective operations on this class will incorrectly

Error:indicate that it is *not* an inner class.
